

Data Sheet

MilliSnap™ System

An automated system to detach the Milliflex® funnel while connecting the membrane to the media cassette

Designed to simplify your workflow, the MilliSnap plug and play system is a hands-free method for separating your Milliflex funnel and attaching the membrane to the Millipore media cassettes. The unique convex shape of the Milliflex membrane combined with the MilliSnap system ensures proper contact between membrane and media.

What's more, the small footprint of the MilliSnap system makes it ideally suited for the busy lab bench. Its low operation area allows for easy access in both laminar flow hoods and safety cabinets, enabling operators to quickly and efficiently snap the funnel from the media cassette.

Benefits

- Easy to handle
- Fully automated
- Portable
- Compatible with all Milliflex funnels and media cassettes

REMOVE YOUR MILLIFLEX FUNNEL IN A SNAP

Breaking off the Milliflex funnel has never been easier. Simply place the membrane on the media, insert your unit into the MilliSnap system and close the safety glass. Using pressure, the MilliSnap system automatically separates the funnel from the membrane cassette. Once complete, you can easily remove the broken funnel and begin the incubation.

For the ultimate convenience and efficiency, combine the Milliflex PLUS pump with the MilliSnap automated system. After utilizing the Milliflex PLUS Pump during the filtration step, simply introduce the funnels and the media cassettes into the MilliSnap system.

Feature	Benefit
Plug and play installation	Ease of use
Fully automated	Hands off operation
Secure design	Integrates seamlessly into your current Milliflex workflow
Lightweight, compact design	Portable
Comprehensive range of adapters available	Designed for use with the entire family of Milliflex funnels and media
Broad resistance to disinfectants and UV	Compatible with a range of safety hoods

MilliSnap System – easy to use, fully automated

- 1 Put membrane on the media

- 2 Put the unit into the MilliSnap system and close the safety glass

- 3 Take the unit out of the MilliSnap system and remove the funnel

- 4 Incubate

SPECIFICATIONS

Materials of Construction

Housing:	Polyurethane
Frame:	304L stainless steel and epoxy paint
Safety glass:	Polycarbonate
Safety glass handfuf:	304L stainless steel
LED protector:	Polycarbonate
Adapters:	Polyoxymethylene (POM)
Adapter joint:	Ethylene propylene diamine monomer (EPDM)
Feet:	Polyvinyl Chloride (PVC)
Front sticker:	Polyester

Dimensions

Length:	200 mm (7.87 in)
Width:	190 mm (7.48 in)
Height:	335 mm (13.18 in)
Weight:	7.7 kg (17lb)

Power

Supply voltage:	100V – 240V (50 Hz – 60 Hz)
Nominal consumption:	36 W
Peak state consumption:	300 W

Sanitization

External/internal surfaces:	Alcohol wipe
Adapters:	Autoclave or alcohol wipe

Regulatory Compliance

The MilliSnap system complies with EU Directive 89/336/EEC on electromagnetic compatibility, as attested by the CE mark

ORDERING INFORMATION

MilliSnap System

Description	Qty/Pk	Catalogue No.
MilliSnap System	1	MIL SNAP 01
MilliSnap Kits		
MilliSnap system and Milliflex PLUS pump single head	1	MXF SNAP 01
MilliSnap system and Milliflex PLUS pump double head	1	MXF SNAP 02
MilliSnap system and Milliflex PLUS pump triple head	1	MXF SNAP 03
MilliSnap System Accessory		
MilliSnap system protective glass	1	MSGLASS 01
MilliSnap System Adapters		
MilliSnap system tall black adapter for incubation on solid media cassette	1	MSSM 100 01
MilliSnap system flat black adapter for incubation on solid media cassette	1	MSSM 250 01
MilliSnap system tall white adapter for incubation on liquid media cassette	1	MSLM 100 01
MilliSnap system flat white adapter for incubation on liquid media cassette	1	MSLM 250 01

Milliflex PLUS Pumps and Accessories

Description	Qty/Pk	Catalogue No.
Milliflex PLUS pump, single head kit	1	MXPP LUS 01
